Smoby

SIMBA · DICKIE · GROUP

SMOBY: FIRST FRENCH TOYS MAKER

Smoby firm was born in 1924 in the middle of the French Jura. Originally specialized in manufacturing small wooden items, the firm made the choice to turn towards plastic goods in the 1950's.

Thanks to this new activity, the firm developed its turnover very quickly, by selling top of the range toys with a "French style". Armed with all these years of experience, Smoby teams are used to hand on their historical know-how from generation to generation.

Today, Smoby offers a wide range of high-quality products with a modern design and trendy colors, each one thought out in details to be fit for children needs.

A new Smoby product in 3 main points:

- 12 months working from its first idea until its launch on the market
- A team of 10 people working together during its creation and design phase (marketing manager, R&D engineer, products & graphics designer, quality & security experts, industrialisation team)
- Major investments in new moulds and technologies

Basically, when a new Smoby toy is created, the common thread is always the will **to create a product that will help children from all over the world to awaken, to learn, to play, to make up stories, to imitate adults, to laugh, to move, to socialize,...**
In summary : to blossom !

DID YOU KNOW?

When you buy a **Smoby** product, you contribute to create more than **700 jobs in Europe**.

Today the share of the Smoby products manufactured in European Union rises to 80%:
70% in France - for plastic toys
10% in Spain - for metal toys

Whatever their location of manufacture, each Smoby product has been invented and designed within its Headquarters located in the French Jura.

SMOBY FRANCE: A COMMITTED PLAYER IN THE CIRCULAR ECONOMY

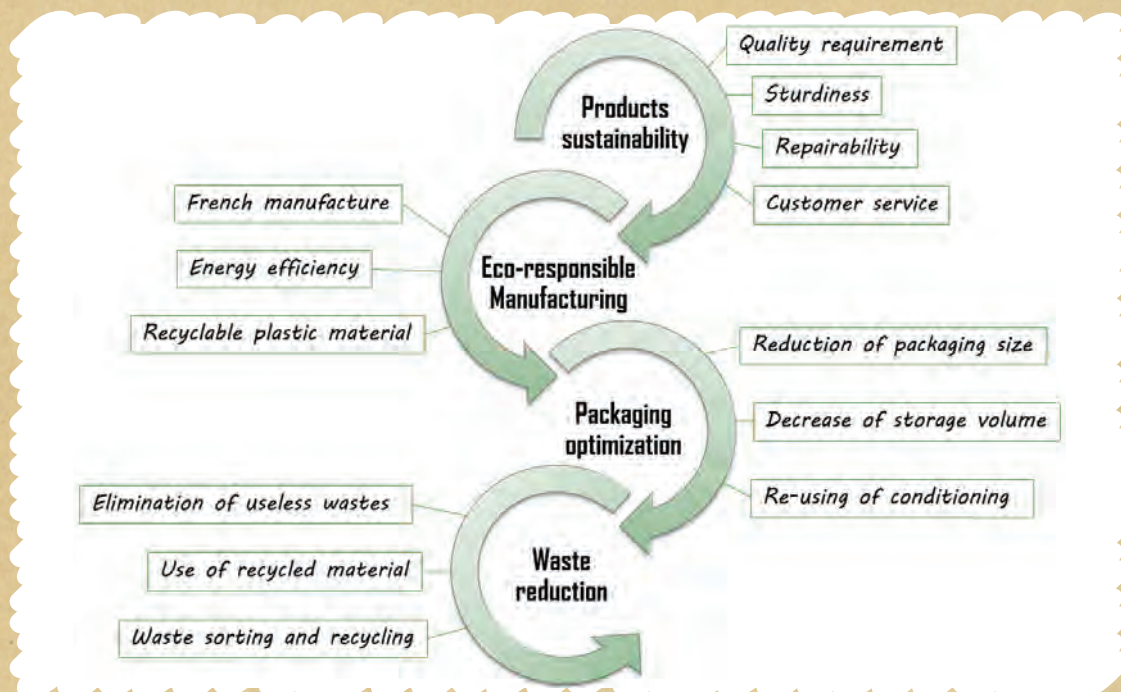

The historical Headquarter of Smoby and its manufacturing sites as well as its storage warehouses are located in the middle of a Natural Park.

When a firm takes roots in such a beautiful Natural Park, the protection of the natural heritage is an integral part of its concerns.

The 400 Smoby employees who have the pleasure to work in a setting of lakes and mountains give birth to toys assigned to guide children in their discovery of the World.

That's why this is very naturally that we endeavour to develop products in an eco-responsible approach.

Because as the first French toys maker, that seems to us an evidence.

Contrary to popular belief, Smoby plastic toys Made In France have many advantages for the final consumer and for the environment :

Recyclable plastic material
Washable toys – easy to maintain
Weather resistant (UV treated)
Repairable and **sustainable**
